

TOTAL HYDRAULIC SEAL COMPONENTS

Kits & Cord

We stock a large variety of O-Ring Kits in Inch & Metric Sizes. O-ring splicing kits, Japanese Industrial Standards, Boss Plumbing Application Kits to name just a few. We can custom build you a kit with our blank box program. Simply specify the number of parts you need, material desired and we will build one, custom label it for you all within a few days. We'll even refill the box for you when you're out!

O-Ring Cord

Readily available in spools in NBR, FKM and Silicone in both inch and metric cross sections up to 10mm thickness. We have cold bonding agents available so you can make your own custom seal on the spot (static applications only).

We even have the ability to get fully vulcanized seals with straight cuts or skive (45 degree angle) in as little as 1-2 days.

Let us show you how we can keep you in motion. Our seal professionals are ready to help you.
